

RxRevu

Founded by Providers

RxRevu was founded by Dr. Kevin O'Brien, who needed a simple way to manage his mother's rising drug costs. He realized there was a better method than manually searching for affordable options to bring to her provider.

Funded by Health Systems

Over the years, significant investment from leading health systems has allowed us to focus specifically on technology enhancements that matter most to providers and care teams.

Leading Investors

Collaboration With Innovation Partners

RxRevu develops best-in-class solutions in conjunction with select innovation partners. This way, we are able to test, refine, and deploy the most effective decision-support solutions that drive value for patients and providers.
